

New Ability: the HABILITY Kitchen

Marco Miscioscia, architect and designer, collaborated with Valcucine to design a kitchen for the wheelchair user that embodies the customary beauty of all Valcucine kitchens and can be used by anyone. HABILITY—a combination of the Latin word “habilis”: “easily managed, handy; suitable, fit” and “ability”—provides freedom and ease to the differently-abled cook.

The secret is Easy Food, a worktop cast in a single stainless steel die that allows the wheelchair user to wash, drain, chop and cook at one easy-to-clean workstation; there is no need to move pots and pans from one area to another. Bautuk created a worktop with removable dish drainers and transportable sinks—a self-cleaning system conveys water to the service sink—so everything is always right where you need it, leaving both hands free to enjoy cooking (and even cleaning!) in this fully accessible, ergonomically accurate, sustainable Valcucine kitchen.

Valcucine products incorporate timeless aesthetics, unparalleled materials and devotion to details: in HABILITY, form and function are perfectly merged, so the wheelchair user can enjoy a high-design, high-tech kitchen.
