

## **ARTEMATICA SYNTHESIS—Come Together Right Now...**

**Bold rectangular blocks of red, white and blue** combine to capture the eye and the imagination, like sculpture. Pure units in single materials—acrylic resin, glass or steel—take away that work area look and make this kitchen a centerpiece.

**Streamlined, flush Artematica Synthesis**—a system with concealed functional elements: hob, sink, tap and oven—becomes pure domestic architecture: buildings within buildings.

**The doors and worktops are Cristalan®**, an extremely versatile material made from natural minerals and aluminum hydroxide bound with high-quality acrylic—hardwearing; stain- scratch- cut- heat- and water-resistant; 100% anti-bacterial, thanks to the presence of silver ions (used as far back as ancient Rome).

And to enhance its eco-integrity, the system's 100% aluminum frame is labeled for recycling.
